

Usa el modelo visual para resolver cada problema.

$4 \frac{3}{5} - 2 \frac{4}{5} = ?$

Para resolver un problema de resta de fracción una estrategia es sombrear la cantidad inicial primero ($4 \frac{3}{5}$).

Luego marque los enteros (2).

Por último marque la fracción ($\frac{4}{5}$).

Ahora podemos ver que $4 \frac{3}{5} - 2 \frac{4}{5} = 1 \frac{4}{5}$

Respuestas
