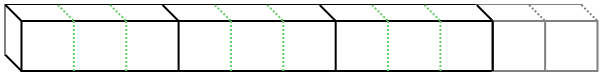
Identificando unidades más pequeñas

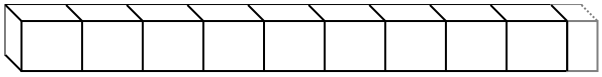
Nombre:

Determinar el número de piezas fraccionarias más pequeñas que se pueden hacer a partir de la pieza más grande.

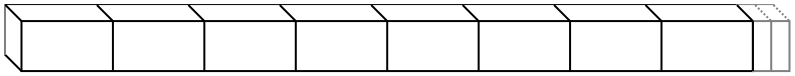
Ej) $3\frac{2}{3}$



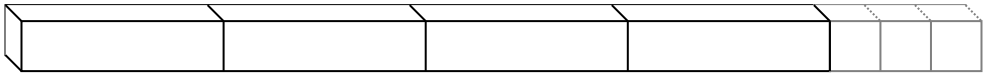
1) $9\frac{1}{2}$



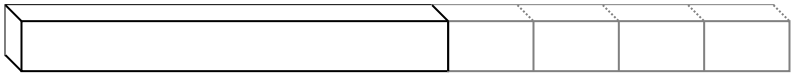
2) $8\frac{2}{5}$



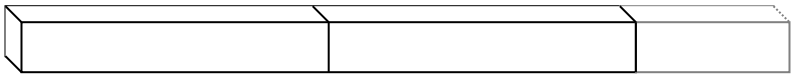
3) $4\frac{3}{4}$



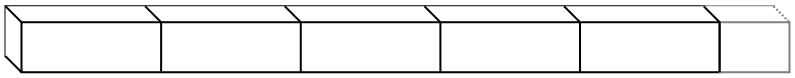
4) $1\frac{4}{5}$



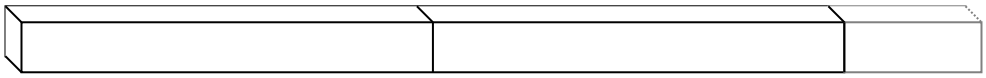
5) $2\frac{1}{2}$



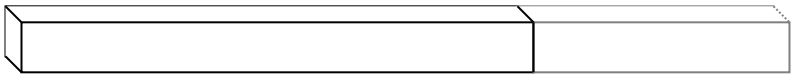
6) $5\frac{1}{2}$



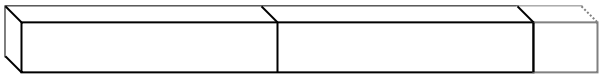
7) $2\frac{1}{3}$



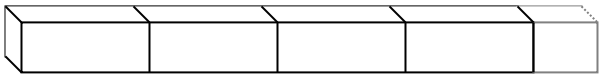
8) $1\frac{1}{2}$



9) $2\frac{1}{4}$



10) $4\frac{1}{2}$



Respuestas

Ej. 11

1. _____
2. _____
3. _____
4. _____
5. _____
6. _____
7. _____
8. _____
9. _____
10. _____

1-10	90	80	70	60	50	40	30	20	10	0

Determinar el número de piezas fraccionarias más pequeñas que se pueden hacer a partir de la pieza más grande.
